# CONCLUSION GENERATOR (ADVANCED)

*In this blueprint, you'll learn how to use this free template, and how this template might fit into your workflow. The next few pages include some sample input and output for the template. Be very careful with your input. Study the following examples and analyze them carefully. Why? So you can achieve better results. In more than 95% of cases, people who get poor output after 3 generations had poor input. That's why it's critical to fully understand what type of input a template expects before you start using it. # INSTRUCTIONS AND WORKFLOW SUGGESTIONS

The Frase AI template "Conclusion Generator (Advanced)" is a free template and it's designed to write a killer conclusion to your blog post using multiple paragraphs.

So in a way, it's very similar to "Conclusion Generator (Basic)" except that the output from this advanced template is multiple paragraphs.

What's the use case for this template? When you have to conclude a blog post and would like to fill the article with more relevant words, why not have a longer conclusion? In that use case, this template is perfect!

Article Title: How to Practice for a Marathon

## OUTPUT: PRO VERSION

In conclusion, practicing for a marathon is a lot like training for anything else. Just because you haven't run a race before doesn't mean you won't be able to complete one successfully. In fact, it's probably easier than you'd expect.

The key is to set realistic expectations for yourself. Don't expect to finish in less than three hours; instead, aim for a goal that feels achievable and reasonable. Then, use the same techniques you'd use to train for any other endurance sport. For example, if you want to improve your speed, focus on intervals where you sprint for short periods of time.

Once you've got your base covered, add in some longer runs and hill repeats. These will help build strength and stamina, which will allow you to tackle the hills without having to walk too far. Once you've done that, you can move onto the next step: building up your aerobic capacity. This means increasing your heart rate over time, so that you can sustain higher levels of exertion for longer periods of time.

Finally, you'll want to incorporate some cross-training exercises. Cross-training helps prevent injuries and improves flexibility, so it's a must for runners who plan on competing in multiple races throughout the year. So, whether you're planning on tackling a half-marathon or a full marathon, keep these tips in mind and you'll be well on your way to achieving your fitness goals!

Article Title: Secrets to Get More Backlinks

## OUTPUT: PRO VERSION

In conclusion, building links is one of the easiest ways to boost your rankings and increase traffic to your site. However, it doesn't happen overnight. In fact, it takes months of hard work and dedication to build a solid foundation of quality backlinks.

The key to success is finding high-quality sites that are relevant to your niche and linking to their content. This means that you shouldn't focus solely on link farms; instead, look for blogs, forums, and websites that are already established and trusted within your industry. Once you've found these sites, use tools like Ahrefs and Majestic SEO to identify which pages on each website are ranking highly for keywords related to your target audience. Then, create content around those topics and submit it to the same sites where you found the original content.

Once you've built up a decent number of links, you'll notice that your search engine rankings begin to improve dramatically. So keep working away at it and you'll eventually reach your goal of having tons of valuable backlinks pointing to your site!
