

FRASE AI TEMPLATE BLUEPRINT

PARAGRAPHS FROM FACTS

In this blueprint, you'll learn how to use both the FREE and Pro versions of this template, and how this template might fit into your workflow. The next few pages include some sample input and output for the template. Be very careful with your input. Study the following examples and analyze them carefully. Why? So you can achieve better results. In more than 95% of cases, people who get poor output after 3 generations had poor input. That's why it's critical to fully understand what type of input a template expects before you start using it. Join the [Frase Facebook group](#) if you have questions or are struggling.

RANKINGTACTICS.COM

INSTRUCTIONS AND WORKFLOW SUGGESTIONS

The Frase AI template "Paragraphs from Facts" is designed to write multiple paragraphs on a subtopic using facts that you supply. It's designed to stick close to the factual input you give it (as close as an AI can) unlike the "Paragraphs from Background" template which takes more liberties with the output.

What are some use cases? The most appropriate time to use this template is when you want to write about an obscure topic that AI might not know about. I usually think of the "Paragraphs from..." templates as falling into three groups:

1. Good for Broad Topics: Paragraphs from Scratch (ALT, ORIG, BB)
2. Good for Less Broad Topics: Paragraphs from Keywords
3. Good for Niche Topics: Paragraphs from Facts and Paragraphs from Background

I usually start with #1 and then work my way down to #2 and then #3 if I'm not getting acceptable output.

Note: You'll also notice that the formatting for the pro template input looks different from the free template. I did this because I wanted to make the template input easier to enter. So for the pro template, just enter a bunch of sentences combined into a single paragraph and you're good to go! No need for a two-sentence background + some facts in dash mark format.

PARAGRAPHS FROM FACTS: EXAMPLE 1

Blueprint - Free Template

Test Method: Here's an example of what the template expects to see as input, and what it generates as output. For each template, the AI generated three outputs and I selected the highest quality one. Grading was based on whether the selected generation made logical sense, flowed smoothly, and could easily be converted into a blog post.

Input

Title: Karcher S 6 Twin Walk-Behind Outdoor Hand Push Yard Sweeper

Two Sentence Background on Sub-Concept:

Whether it is spring, summer, autumn or winter – the new S 6 Twin sweeper from Kärcher is suitable for year-round cleaning all around the yard and garden. It's also features an ergonomic design with a push handle that adapts to the height of the user.

1-4 Points About the Sub-Concept:

- sweeping width of 33.9" and sweeps up to 32,000 square feet per hour
- waste lands directly in the 10 gallon waste container
- adjustable height side brush to adapt contact pressure to the waste
- fully collapsible design to save space for storage

Heading: Our Thoughts on the Karcher Walk-Behind Sweeper

Output

We've been using the Karcher S6 Twin walk behind outdoor hand push yard sweeper for over two years now. We really like it! The S6 is easy to operate and clean. It does a great job of getting rid of leaves, grass clippings, twigs, sticks, dirt, sand, and other debris.

When we first got our S6, we were surprised at how fast it was able to sweep up large amounts of debris. We didn't realize just how powerful it was until we started using it.

We recommend the S6 to anyone who wants a high quality, durable, and reliable sweeper. It's perfect for homeowners who want to spend less time doing yardwork and more time enjoying life.

We think the S6 is a great buy. It's affordable, easy to maintain, and comes with everything you need to get started. Plus, it's backed by a 2-year warranty.

-- *Grade: B+*

-- *Comments: The output is well written and on point. I wish it used a more of the specs, such as the sweeping width and coverage per hour. It also introduced a 2-year warranty which wasn't mentioned. But this can happen sometimes with this template and it's nothing a slight edit couldn't fix.*

PARAGRAPHS FROM FACTS: EXAMPLE 1

Blueprint - Pro Template

Test Method: Here's an example of what the template expects to see as input, and what it generates as output. For each template, the AI generated three outputs and I selected the highest quality one. Title: Karcher S 6 Twin Walk-Behind Outdoor Hand Push Yard Sweeper

Background: Whether it is spring, summer, autumn or winter – the new S 6 Twin sweeper from Kärcher is suitable for year-round cleaning all around the yard and garden. It's also features an ergonomic design with a push handle that adapts to the height of the user. Sweeping width of 33.9" and sweeps up to 32,000 square feet per hour. Waste lands directly in the 10 gallon waste container. Adjustable height side brush to adapt contact pressure to the waste. Fully collapsible design to save space for storage.

Heading: Our Thoughts on the Karcher Walk-Behind Sweeper

Output

We've had our hands on the new Karcher S6 Twin walk behind sweeper for several weeks now. We were impressed with its performance and ease of operation. The machine was easy to set up and operate.

The S6 Twin comes with a wide sweeping width of 33.9 inches, which makes it ideal for large yards and gardens. Its sweeping speed is impressive, reaching up to 32,000 sq ft per hour. This means that you can clean up to 2 acres of grass in just over two hours.

The machine uses a powerful brush system that pushes the debris along the ground. It's fully adjustable to ensure that you get the perfect amount of pressure on the ground.

The machine is made of durable materials that will last for years. It's compact enough to fit inside your garage or shed. It folds down easily for storage and transportation.

Overall, we think the Karcher S6 Twin is a fantastic buy. It's easy to use and offers excellent value for money.

Readers Rating: 4.5 / 5

– Grade: A+

– Comments: *The output is significantly better than the free template. It covers more of the details and stays on point. I especially loved the "readers rating 4.5/5" at the bottom. I almost spit out my drink when I read that part.*

PARAGRAPHS FROM FACTS: EXAMPLE 2

Blueprint - Free Template

Test Method: Here's an example of what the template expects to see as input, and what it generates as output. For each template, the AI generated three outputs and I selected the highest quality one. Grading was based on whether the selected generation made logical sense, flowed smoothly, and could easily be converted into a blog post.

Input

Title: Karcher S 6 Twin Walk-Behind Outdoor Hand Push Yard Sweeper

Two Sentence Background on Sub-Concept:

Whether it is spring, summer, autumn or winter – the new S 6 Twin sweeper from Kärcher is suitable for year-round cleaning all around the yard and garden. It's also features an ergonomic design with a push handle that adapts to the height of the user.

1-4 Points About the Sub-Concept:

- sweeping width of 33.9" and sweeps up to 32,000 square feet per hour
- waste lands directly in the 10 gallon waste container
- adjustable height side brush to adapt contact pressure to the waste
- fully collapsible design to save space for storage

Heading: Great for Picking Up Leaves

Output

When it comes to picking up leaves, the Karcher S 6 Twin is the perfect solution. The twin sweeper is ideal for clearing leaves from sidewalks, driveways, patios, gardens, lawns, and other outdoor areas.

This model is equipped with a powerful motor that allows it to sweep up to 32,000 sq ft per hour. This means that you can clean large yards quickly without having to spend hours doing it manually.

With its ergonomically designed handle, the twin sweeper makes it easy to maneuver even while wearing gloves. Plus, the twin sweeper is fully collapsible for convenient storage.

As a result, the twin sweeper provides effortless leaf collection and disposal. So, whenever you need to clean up after the fall season, just reach for the Karcher S 6 twin walk behind outdoor hand push yard sweeper.

– *Grade: B+*

– *Comments: The output is good and touches on the sub-concept of leaves. It also discusses the area the machine sweeps per hour. Unfortunately it mentions that it comes with a powerful motor, while the sweeper is manual. But I could see how that's something easy to be confused about. Again, this is something that would be easy to edit before publication.*

Title: Karcher S 6 Twin Walk-Behind Outdoor Hand Push Yard Sweeper

Background: Whether it is spring, summer, autumn or winter – the new S 6 Twin sweeper from Kärcher is suitable for year-round cleaning all around the yard and garden. It's also features an ergonomic design with a push handle that adapts to the height of the user. Sweeping width of 33.9" and sweeps up to 32,000 square feet per hour. Waste lands directly in the 10 gallon waste container. Adjustable height side brush to adapt contact pressure to the waste. Fully collapsible design to save space for storage.

Heading: Great for Picking Up Leaves

Output

Picking up leaves is tedious and boring. But if you've got a large lawn, it can be a real chore. Fortunately, the Karcher S 6 Twin walk behind outdoor hand push yard sweeper makes leaf removal easy.

This machine is perfect for sweeping up leaves, grass clippings, twigs, sticks, and other debris. The machine comes equipped with a long reach arm that allows you to sweep up to 32,000 sq ft per hour. This means that you can clean up to 2 acres per hour!

Plus, the machine is fully collapsible for compact storage. So you can easily store it in the garage or shed during the off season.

To make the job even easier, the machine includes a 10 gallon trash bin. Simply empty the bin after each use. The bin holds up to 1 cubic foot of material and empties through a hinged lid.

The machine also features adjustable height side brushes to adapt contact pressure to different types of waste. Plus, the machine adjusts its own height automatically based on the size of the operator.

So now you can spend less time doing chores and more time enjoying life.

-- Grade: A+

-- Comments: The output is perfect. It touches on the leaves from the sub-concept, the 32,000 sqft per hour, and even the 10 gallon trash bin. Very good!

PARAGRAPHS FROM FACTS: EXAMPLE 3

Blueprint - Free Template

Test Method: Here's an example of what the template expects to see as input, and what it generates as output. For each template, the AI generated three outputs and I selected the highest quality one. Grading was based on whether the selected generation made logical sense, flowed smoothly, and could easily be converted into a blog post.

- waste lands directly in the 10 gallon waste container
- adjustable height side brush to adapt contact pressure to the waste
- fully collapsible design to save space for storage

Heading: Great Father's Day Gift

Output

This is the perfect gift for Dad on Father's Day. The Karcher S6 Twin walk behind outdoor hand push lawn sweeper is a great tool for keeping his yard clean and tidy. This sweeper comes complete with a 10 gallon waste bin and a telescopic extension arm.

He can sweep up to 32,000 sq ft per hour, while the adjustable height side brush adjusts to the size of the debris being swept. He can even adjust the height of the handle to fit him perfectly.

The S6 Twin is easy to store and folds down flat for compact storage. It's made of durable plastic and weighs only 16 lbs. So he can easily carry it wherever he goes.

Dad will appreciate having a sweeper that does double duty. Not only does it keep his yard clean, but it saves him time and energy.

– *Grade: A*

– *Comments: It's awesome how easy it is to tweak the output based on the the sub-concept. The template did a great job here of adjusting the output for father's day while also incorporating some of the points that we specified. It did introduce some additional facts, such as the weight. But that could be easily adjusted with some slight edits.*

PARAGRAPHS FROM FACTS: EXAMPLE 3

Blueprint - Pro Template

Test Method: Here's an example of what the template expects to see as input, and what it generates as output. For each template, the AI generated three outputs and I selected the highest quality one. Title: Karcher S 6 Twin Walk-Behind Outdoor Hand Push Yard Sweeper

Background: Whether it is spring, summer, autumn or winter – the new S 6 Twin sweeper from Kärcher is suitable for year-round cleaning all around the yard and garden. It's also features an ergonomic design with a push handle that adapts to the height of the user. Sweeping width of 33.9" and sweeps up to 32,000 square feet per hour. Waste lands directly in the 10 gallon waste container. Adjustable height side brush to adapt contact pressure to the waste. Fully collapsible design to save space for storage.

Heading: Great Father's Day Gift

Output

Father's Day is coming up soon. What better gift for Dad than a brand new Karcher S 6 Twin walk behind outdoor hand push lawn sweeper?

This machine is perfect for getting rid of leaves, grass clippings, pine needles, twigs, dirt, sand, and other debris from your yard.

It's also easy to store and transport. Just fold it up and place it in its own bag. The compact size makes it ideal for travel.

Dad will appreciate having his very own handy sweeper. He can sweep up after himself without having to spend hours doing it manually.

He can even adjust the height of the side brushes to suit his personal preference. This feature allows him to adapt the contact pressure to the type of waste he encounters.

Dad will also love the fact that this machine comes with a 10 gallon waste bin. That means he can clean up large amounts of waste without worrying about filling up his trash cans.

So go ahead and surprise dad with a brand new Karcher sweeper. He'll love it!

– Grade: A

– Comments: *The output is very well written and on point. It also is very tailored for father's day. The only thing holding it back from a full A+ is that it's light on the details. While it did discuss the 10 gallon waste bin, it skipped over some of the other facts.*

Heading: Great for Pets

Output

Just Smarty Interactive Alphabet Chart for Toddlers

This alphabet chart is perfect for toddlers and preschoolers. The bright colors and catchy music will keep them engaged while they practice their ABC's and learn new vocabulary.

Features of this alphabet chart will allow your child to develop new memory skills and spelling abilities. They'll also learn basic math concepts such as counting, addition, subtraction, multiplication, division, and fractions.

Plus, this alphabet chart comes with five different activities that will help your child develop core skills through fun learning methods. These activities include singing, dancing, coloring, playing games, and reading stories.

This alphabet chart is easy to set up and store. Simply attach the included hanging bracket to the wall and hang it up. Your toddler will be able to access the alphabet chart whenever they want.

-- Grade: D

-- Comments: *It's important to note that this is the same input that we used for the "Paragraphs from Background" template. What you'll notice is that template wrote about this product being useful for pets, while this template did not. Why? Because this template is more rigid with the output and doesn't have as much freedom. That is a good thing when you want a more factual based output. So even though this sample earned a D, it's actually a good score because an alphabet chart for pets makes no sense.*

PARAGRAPHS FROM FACTS: EXAMPLE 5

Blueprint - Pro Template

Input

Title: How To Care for An Older Rabbit

Two Sentence Background on Sub-Concept: Your rabbit may eat less as it ages. That's because its metabolism will change to process food at a different rate.

1-4 Points About the Sub-Concept:

- it's natural for an older rabbit to empty its bowl more slowly
- continue to provide unlimited hay and grass because rabbits will self-regulate their diet as they age
- younger bunnies eat hay and treats but an older bunny gets lazy and might just snack on treats, so cut back on those
- keep its water bowl full so it can stay hydrated, especially if it has kidney issues or arthritis
- keep food and water in easy reach for older bunny rabbits

Heading: Do Older Rabbits Eat Less?

Output

As your rabbit ages, it may eat less. This is normal. Your rabbit will naturally adjust its eating habits as it grows older.

Continue to feed your rabbit plenty of fresh hay and grass. Don't worry if your rabbit eats less as it ages. Just keep providing unlimited hay and grass.

Rabbits will self regulate their diets as they grow older. So don't worry if your rabbit starts eating less as it ages. Continue to give it plenty of fresh hay and grain.

Be aware that younger rabbits eat more than older ones. Younger rabbits tend to eat more because they're growing and developing. They need extra calories to fuel their growth.

So if your rabbit seems to eat less as it ages, try cutting down on the amount of treats you give it.

Don't forget to keep its water bowl filled. Rabbits need to stay hydrated as they age.

-- Grade: A

-- Comments: The output is fantastic, but it's just a little choppy which is what's holding it back from that glorious +.

PARAGRAPHS FROM FACTS: EXAMPLE 6

Blueprint - Pro Template

Test Method: Here's an example of what the template expects to see as input, and what it generates as output. For each template, the AI generated three outputs and I selected the highest quality one. Input

Title: How To Care for An Older Rabbit

Background: Your rabbit may eat less as it ages. That's because its metabolism will change to process food at a different rate. It's natural for an older rabbit to empty its bowl more slowly. Continue to provide unlimited hay and grass because rabbits will self-regulate their diet as they age. Younger bunnies eat hay and treats but an older bunny gets lazy and might just snack on treats, so cut back on those. Keep its water bowl full so it can stay hydrated, especially if it has kidney issues or arthritis. Keep food and water in easy reach for older bunny rabbits.

Heading: Do Older Rabbits Eat Less?

Output

As your rabbit grows older, it may start eating less. This is normal. The reason why older rabbits eat less is because their metabolism changes as they age. Their digestive system slows down and they become less active. They tend to eat slower and eat smaller meals.

Continue to feed your rabbit plenty of fresh hay and grass. Rabbits naturally regulate their diets as they grow older. So, don't worry if your older rabbit eats less. Just continue to offer him plenty of fresh food.

Rabbits are very smart animals. They understand when they aren't getting enough food. So, if your older rabbit starts to eat less, give him extra hay and grass. He'll probably catch on quickly and adjust his appetite accordingly.

Don't let your older rabbit get dehydrated. Provide him with plenty of clean, fresh water. Rabbits are prone to dehydration if they don't get enough water. So, make sure he always has access to clean, fresh water.

Keep food and water within easy reach for your older rabbit. Give him a place where he can easily see and smell his food. Also, make sure he can easily reach his water bowl.

Be patient with your older rabbit. Don't force it to eat. Let it decide when it wants to eat. Your older rabbit will likely eat less as it grows older. So, don't try to rush it. Allow it to eat when it feels hungry.

Remember, rabbits are very intelligent creatures. They understand when they haven't been given enough food. So, don't force them to eat. Instead, allow them to decide when they want to eat.

-- Grade: A+

-- Comments: I think this almost deserves higher than an A+. It's fantastic and better than the input!

Title: What Is Topical Authority in SEO & How to Build It

Two Sentence Background on Sub-Concept: Spoiler for this section: No one really knows. With the introduction of Google's Hummingbird algorithm in 2013, topical authority became increasingly important.

1-4 Points About the Sub-Concept:

- hummingbird changed the ranking system for content so that it was determined by relevance to a user's search query
- prior to Hummingbird, keywords were the main emphasis of Google's search algorithms, but Google couldn't understand the context behind user search queries

Heading: How does topical authority work?

Output

Google's Hummingbird algorithm introduced a change in how Google ranks websites based on relevance to a user's search query. This means that topical authority becomes increasingly important.

Hummingbird made changes to the ranking system for content. Prior to Hummingbird, Google used keywords as the primary method of determining rankings. Now, Google uses relevancy to determine rankings.

This means that the quality of your content is now more important than ever. Your content needs to be relevant to users' searches.

So how exactly does topical authority work?

There are two types of topical authority:

1. Authoritative Content

Authoritative content is content that provides useful answers to questions asked by searchers. For example, if someone asks, "what is the best place to buy shoes online?", authoritative content would answer that question.

2. Popular Content

Popular content is content that is shared frequently by other websites. For example, if a website posts a link to a popular article, such as a news story, that article gains popularity.

Both forms of topical authority are equally important. The key is to create high-quality content that is both authoritative and popular.

To build topical authority, you need to publish high-quality content regularly. That means publishing articles, videos, infographics, etc., on topics that are highly searched for.

Publish content that is both authoritative (answers questions) and popular (is shared).

-- Grade: A

-- Comments: I like how the template started by discussing the input but then expounded upon it as it described the two types of topical authority. They both make sense and sound good. I think a few slight edits would have this ready to publish in no time.

PARAGRAPHS FROM FACTS: EXAMPLE 7

Blueprint - Pro Template

Title: What Is Topical Authority in SEO & How to Build It

Background: Spoiler for this section: No one really knows. With the introduction of Google's Hummingbird algorithm in 2013, topical authority became increasingly important. Hummingbird changed the ranking system for content so that it was determined by relevance to a user's search query. Prior to Hummingbird, keywords were the main emphasis of Google's search algorithms, but Google couldn't understand the context behind user search queries.

Heading: How does topical authority work?

Output

There's no real consensus among experts on exactly what topical authority means. Some say it's just another term for link building while others believe it's something completely different.

Regardless of what it actually means, topical authority is becoming increasingly important. In fact, according to Moz, it's now the second-most important ranking signal after backlinks.

So what is topical authority? Well, it's basically the amount of trust Google places in a website based on its content. The higher the topical authority, the better.

Google uses several factors to determine topical authority including links pointing to the site, the quality of those links, and the overall reputation of the site.

To build topical authority, you need to create high-quality content that ranks well organically. This includes having unique, useful content that answers questions and solves problems.

As long as you're providing valuable content, you'll naturally attract links and gain topical authority over time. However, you can speed up the process by doing outreach to other websites that share your interests.

Once you've built up enough topical authority, you'll start seeing results in your rankings.

-- *Grade: A+*

-- *Comments: I think this sounds professionally written and covers the topic very well. Great job!*

Blueprint - Free Template

Test Method: Here's an example of what the template expects to see as input, and what it generates as output. For each template, the AI generated three outputs and I selected the highest quality one. Grading was based on whether the selected generation made logical sense, flowed smoothly, and could easily be converted into a blog post.

Input

Title: How to Promote Your Blog

Two Sentence Background on Sub-Concept:

Redditors hate advertising and marketing. If your content smells like self-promotion, they will not hesitate to throw you out.

1-4 Points About the Sub-Concept:

- reddit loves useful content
- share barebones version of your content
- strip everything out, especially your internal and external links
- leave only a link back to the original at the bottom of your Reddit post, so anyone who's interested can check it out

Heading: Share barebones posts on Reddit

Output

Promoting your blog on Reddit is a bit different than promoting other social media sites. On Reddit, users hate advertisements and marketing. If your post smells like self-promotional spam, they will not hesitate throwing you out.

So instead of posting ads, you should share barebones versions of your content. This means stripping everything out, including your internal and external links.

This will allow you to promote your blog without being annoying. Plus, you'll save a ton of time and effort.

When sharing barebones posts on Reddit, you should always leave a link back to the full article. That way, anyone who wants to see the full post can click through to it.

Don't forget to add a comment explaining why you shared the barebones version of your post. This will give visitors a reason to come back and visit your site.

-- Grade: A

-- Comments: *It's so close to being perfect. It sounds great but just missed that little bit about sharing the single link back to the original at the bottom of the post. Other than that, it's flawless.*

PARAGRAPHS FROM FACTS: EXAMPLE 8

Blueprint - Pro Template

Test Method: Here's an example of what the template expects to see as input, and what it generates as output. For each template, the AI generated three outputs and I selected the highest quality one. Grading was based on whether the selected generation made logical sense, flowed smoothly, and could easily be converted into a blog post.

Title: How to Promote Your Blog

Two Sentence Background on Sub-Concept:

Redditors hate advertising and marketing. If your content smells like self-promotion, they will not hesitate to throw you out. Reddit loves useful content. Share barebones version of your content. Strip everything out, especially your internal and external links. Leave only a link back to the original at the bottom of your Reddit post, so anyone who's interested can check it out.

Heading: Share barebones posts on Reddit

Output

Redditors hate advertising and promotion. They think it makes the site look spammy. So if you try to promote your content on Reddit, you'll probably fail.

Instead, share barebones versions of your content. Strip out everything else except the link back to the original source. This will allow other redditors to see the original article without having to click through to another website.

This method works because Reddit users love useful content. They'll appreciate the effort you've made to create quality content.

When sharing barebones content, leave just a link back to the full article at the bottom of your post. This allows anyone who wants to view the original article to do so.

Don't worry about getting banned from Reddit. Just remember to follow the rules and stick to posting useful content.

-- Grade: A

-- Comments: Unlike the free template, this pro version did capture that nugget about sharing the link back to the full version at the bottom of the post. But I don't think the beginning starts out as nice as the free version. So overall, I believe it deserves the same score.

PARAGRAPHS FROM FACTS: EXAMPLE 9

Blueprint - Free Template

Test Method: Here's an example of what the template expects to see as input, and what it generates as output. For each template, the AI generated three outputs and I selected the highest quality one. Grading was based on whether the selected generation made logical sense, flowed smoothly, and could easily be converted into a blog post.

Input

Title: Library to Host Halloween Family Day with Authors R.L. Stine and Mary Pope Osborne

Two Sentence Background on Sub-Concept: The Library of Congress will host a day of family-friendly activities on Saturday, Oct. 22, in the Thomas Jefferson Building. The day will feature a special program at 2 p.m. in the Coolidge Auditorium with beloved authors R.L. Stine, author of the "Goosebumps" series, and Mary Pope Osborne, author of the "Magic Tree House" series.

1-4 Points About the Sub-Concept:

- Stine and Osborne are celebrating 30 years of their bestselling series
- Beginning at 10 a.m., visitors are invited to participate in "spooky" art activities on the Mezzanine level of the Great Hall
- Read a scary story in the reading corner or find an adventure with a book about the world
- Enjoy creepy music and fantastical images from the Library's collections, perfect to fill your own treehouse
- The program with Stine and Osborne will feature spooky elements, including eerie lights, frightening characters and surprises for the audience

Heading: Event Celebrates 30 Years of "Goosebumps" and "Magic Tree House" Series with Authors

Output

The Library of Congress will celebrate the 30th anniversary of two popular children's books series with a special event on October 22nd. Author R. L. Stine and author Mary Pope Osborne will share stories and answer questions during a presentation at 2pm in the Coolidge Auditorium.

Beginning at 10am, visitors are invited to participate spooky art activities on the mezzanine level of Great Hall. Activities include painting pumpkins, decorating jack-o'-lanterns, building ghostly houses, and finding adventures with books about the world.

Readers are encouraged to bring their favorite scary stories to the reading corner, where they can hear tales told by Stine and Osborne. Visitors may also find inspiration in the library's collection of creepy illustrations and fantastical images.

Stories written by both authors will be available for free throughout the day.

The Library of Congress is located at 101 Independence Ave. SE Washington, DC 20540. For more information, visit www.loc.gov.

-- Grade: B

-- Comments: It sure sounds good, but there are some factual issues. It gets a little carried about discussing that there will be decorating jack-o-lanterns, and building ghost houses. It also mentions that the books by the authors will be free throughout the day. So I have to knock the score down a bit, but it's something an edit could easily fix.

Heading: Event Celebrates 30 Years of "Goosebumps" and "Magic Tree House" Series with Authors

Output

The Library of Congress will celebrate 30 years of the popular children's books series "Goosebumps" and "Magic Tree House" with two events on October 22nd.

At 2pm, join authors R. L. Stine and Mary Osbourne for a special presentation in the Coolidge Auditorum. They will share stories from their books, answer questions, and sign copies of their latest titles.

Beginning at 10am, families can explore the library's collection of scary stories and other fun activities inspired by the books. Activities include reading a scary story in the Reading Corner, listening to spooky music, and finding adventures with a book about the real world.

Visitors can also create their own scary stories in the Reading Corner. In addition, the Library has created a special display featuring items from its collection related to the books.

-- Grade: B

-- Comments: Just like the free template, this pro template also struggles with the crazy amount of details. Again, a final edit could easily fix this. So just keep in mind that if your input is very fact heavy, then you'll need to double check the output before publication.

PARAGRAPHS FROM FACTS: EXAMPLE 10

Input

Title: Are Tacos Healthy?

Two Sentence Background on Sub-Concept: Protein is an essential macronutrient your body needs to build bone, muscle, and skin, among other uses. In the United States, tacos are one of the top sources of protein and calories that people ages 18–64 consume regularly.

1-4 Points About the Sub-Concept:

- most tacos, including vegetarian versions, provide about 6–13 grams of protein each
- the average sedentary adult needs at least 46–56 grams of protein per day, though the exact amount varies from person to person depending on their age, sex, activity level, overall health, and other factors
- however, when it comes to protein, not all types are created equal
- the type of protein in a taco will influence its calorie count and nutritional value

Heading: Tacos are Packed with Protein

Output

Tacos are packed with protein. They contain anywhere from 5-10g of protein per taco. That's enough protein to fuel your muscles and bones.

Most tacos, including vegetarian versions provide about 6-13 grams of protein each. The average sedentary adult needs about 46-56 grams of protein per daily. However, the exact amount varies from individual to individual based on their age, sex and activity level.

However, when it comes to proteins, not all types are made equal. Some are better than others.

For example, beef contains 8-9g of protein per 100grams while chicken only provides 4-5g of protein per 100 grams. Beans and legumes are excellent sources of plant-based protein.

So, next time you order a taco, remember that it's packed with protein!

-- *Grade: A*

-- *Comments: The output is very good. I have no complaints and I really liked the encouragement at the end to remember that tacos are packed with protein the next time I order one. Great!*

PARAGRAPHS FROM FACTS: EXAMPLE 10

Blueprint - Pro Template

Test Method: Here's an example of what the template expects to see as input, and what it generates as output. For each template, the AI generated three outputs and I selected the highest quality one. Title: Are Tacos Healthy?

Background: Protein is an essential macronutrient your body needs to build bone, muscle, and skin, among other uses. In the United States, tacos are one of the top sources of protein and calories that people ages 18–64 consume regularly. Most tacos, including vegetarian versions, provide about 6–13 grams of protein each. The average sedentary adult needs at least 46–56 grams of protein per day, though the exact amount varies from person to person depending on their age, sex, activity level, overall health, and other factors. However, when it comes to protein, not all types are created equal. The type of protein in a taco will influence its calorie count and nutritional value.

Heading: Tacos are Packed with Protein

Output

Most tacos contain around 6–13 grams of total protein. This includes both lean and fat-free meat, poultry, fish, seafood, eggs, dairy products, nuts, seeds, legumes, soybeans, and vegetables.

When it comes to protein, tacos aren't just full of protein; they're packed with it!

Not only does protein fill you up, it provides energy. Your body needs protein to create enzymes, hormones, antibodies, and other substances needed to function properly.

Proteins are made up of amino acids, which are the building blocks of muscles, bones, hair, nails, and skin. Proteins are found in animal foods, such as meats, poultry, fish, milk, yogurt, eggs, and cheeses. Plant foods, such as grains, fruits, and vegetables, also contain protein.

As mentioned above, tacos are one of America's favorite quick meals. They're easy to eat on the go and can be eaten alone or shared with friends.

Tacos are convenient and nutritious. They're filling enough to satisfy hunger without weighing down your stomach. Plus, they're affordable and delicious.

So, next time you're craving tacos, try eating them instead of fast food. Not only will you save money, you'll also benefit from the extra nutrition.

-- Grade: A++

-- Comments: *Fantastic. Absolutely fantastic output. While the free template did a good job, this result hit it out of the park. There is no way I could write as well as the machine!*

Title: Mixed Martial Arts

Two Sentence Background on Sub-Concept: Choosing a form of martial art that aligns with your goals and personal needs can be overwhelming. Many kinds of Martial Arts may leave you wondering whether to choose one discipline over the other.

1-4 Points About the Sub-Concept:

- To be able to select which form of martial arts is right for you, you need to consider the three core areas that make up all of Mixed Martial Arts fighting

- One form involves stand-up fighting where you fight with your hands, feet, elbows, and knees, and it includes Boxing, Muay Thai, Karate, and Taekwondo are examples of stand-up fighting

- The second involves clinch techniques where opponents grapple one another to get leverage, such as in Judo and Jiu-Jitsu

- The last and final is on the ground, which is commonly witnessed in wrestling

- As a beginner, Jiu-Jitsu and wrestling could be your priority to learn as you begin to gain more strength and form

Heading: How to Get Started as a Beginner

Output

Choosing a form of Martial Art that aligns with your goal and personal needs can be daunting. There are so many different forms of Martial Arts to choose from, and deciding which one is right for you can be confusing.

To be able to select which type of Martial Art is right for you, first you need to consider the 3 core areas that make up MMA fighting. These are stand-up fighting, clinch techniques, and grappling on the ground.

Stand-Up Fighting

There are several types of stand-up fighting including boxing, Muay Thai, karate, taekwondo, judo, jiu-jitsu, and wrestling. Each style focuses on certain skills that are useful in combat.

Clinch Techniques

Clinch techniques involve grappling on the ground, such as in judo and jujitsu. Clinch techniques allow fighters to control positions on the ground. They also give them opportunities to strike while on top.

Grappling on the Ground

Grappling on ground allows fighters to utilize their strength and speed to win fights. Wrestling is a common example of grappling on the ground. Wrestlers often use takedowns to score points during a match.

As a beginner, you should probably start off learning stand-up fighting. Stand-up fighting is easier to learn and master, and it gives you the opportunity to practice striking and clinching techniques.

Once you've mastered stand-up fighting, you can move onto clinch techniques. This will teach you how to apply pressure against your opponent, and it will give you the chance to develop your own unique style.

After mastering both stand-up fighting and clinch techniques, you can finally try your hand at grappling on the ground. Grappling on the ground teaches you how to take down your opponent and secure a submission hold.

In conclusion, there are many different types of Martial Arts available to train in. Choose one that aligns with your personal goals and interests.

-- Grade: A

-- Comments: I'm giving this a high score because it's a very difficult topic for the AI to handle. Not only are we asking it to write about a niche topic, we're also having it compare three different types of fighting styles, each with their own types (e.g., stand up fighting includes Boxing, Muay Thai, Karate, and Taekwondo). Overall, I would expect to do some editing before publication, and that's perfectly okay given the nature of the input.

PARAGRAPHS FROM FACTS: EXAMPLE 11

Blueprint - Pro Template

Test Method: Here's an example of what the template expects to see as input, and what it generates as output. For each template, the AI generated three outputs and I selected the highest quality one. Grading was based on whether the selected generation made logical sense, flowed smoothly, and could easily be converted into a blog post.

Input

Title: Mixed Martial Arts

The second involves clinch techniques where opponents grapple one another to get leverage, such as in Judo and Jiu-Jitsu. The last and final is on the ground, which is commonly witnessed in wrestling. As a beginner, Jiu-Jitsu and wrestling could be your priority to learn as you begin to gain more strength and form.

Heading: How to Get Started as a Beginner

Output

When deciding which type of MMA to start with, you need to think about the three core areas that comprise all forms of mixed martial arts fighting. These include stand-up fighting, grappling, and striking.

Stand-up fighting involves hand, foot, elbow, knee, and body attacks. This style of fighting is used in boxing, Muay Thai, karate, taekwondo, judo, jiu-jitsu, and other styles. Stand-up fighting is often referred to as street fighting.

Grappling involves grappling techniques, which are done on the ground. Grappling is often seen in Brazilian Jiu Jitsu, Judo, Sambo, Wrestling, and Greco Roman Wrestling.

Striking is the third area of mixed martial arts. Striking is typically done while standing up. This includes punches, kicks, headbutts, and throws. This style of fighting can be found in Kickboxing, Boxing, Muay Thai and Tae Kwon Do.

As a beginner, you should start with stand-up fighting. This is the easiest way to learn the basics of mixed martial arts. However, if you decide to go down the road of learning grappling and striking, you'll have a better chance of becoming a successful fighter.

-- Grade: B+

-- Comments: I think the free template did a better job here with the output than the pro template. I would have given this a higher score if the beginning and ending were more developed. But again, the AI struggled with this the most. What I would probably do in this situation (that I didn't do for the test) is perform 3 generations and then take bits and pieces from each generation to "build" my output. If I went that route, I think this could easily get into A territory.
